

Product Brief

T4K37 13-megapixel CMOS Image Sensor

Highlights

- Major worldwide producer of image sensor technology with more than 25 years of experience.
- Many of the Toshiba image sensors utilize advanced technologies such as Backside Illumination (BSI), High Dynamic Range (HDR) and Color Noise Reduction (CNR) for better image quality and truer colors.
- Utilizes a proprietary square-pixel design that enables exceptionally high-quality images with low-power consumption.
- Offers a wide range of sensors from VGA to 20 megapixels.
- Makes ongoing investments in capacity and its robust supply chain is a result of tight procurement relationships and experience in designing, developing and manufacturing image sensors.

Description

The Toshiba T4K37 is 13-megapixel CMOS image sensor that includes all the latest advances in image sensor technology. It supports Backside Illumination (BSI), High Dynamic Range (HDR) and integrated Color Noise Reduction (CNR). BSI offers better light absorption and sensitivity; HDR delivers more detail in dark and light areas; and CNR lowers pixel noise and improves image quality. The T4K37 provides approximately 1½ times higher SNR value than a 1.12 micrometer pixel image sensor with no CNR feature allowing manufacturers to deliver products with high-quality imagery, even in low-light conditions. The sensor has an optical format of 1/3.07 inch with a sensor area of 3120 vertical x 4208 horizontal pixels. It fits into an 8.5 mm x 8.5 mm size camera module enabling high-quality pictures even in low-light conditions for cellular phones and mobile products.

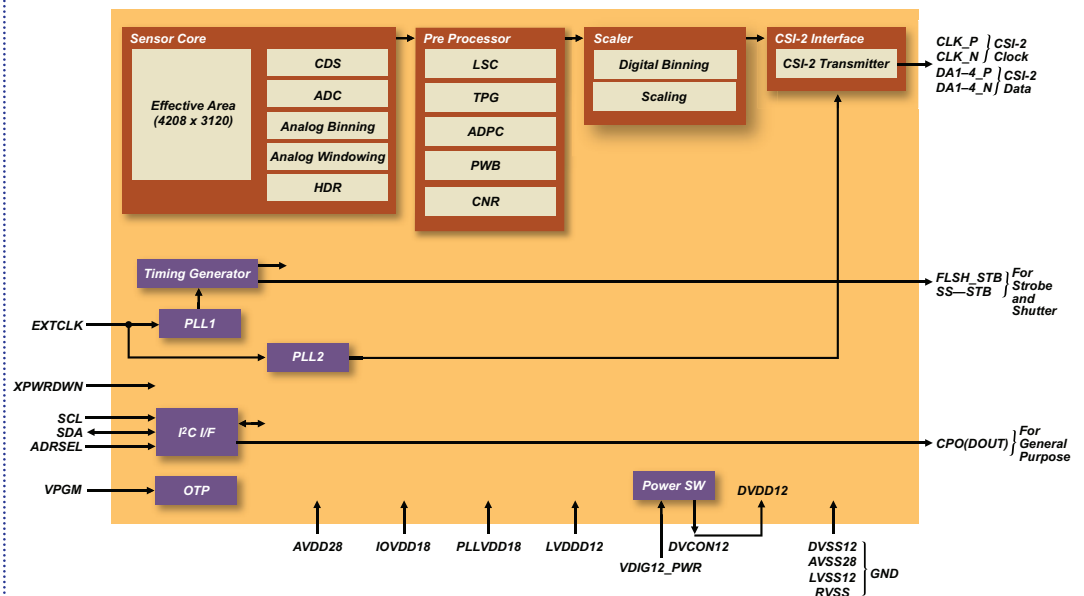

Features

- 1/3.07" 13M resolution (1.12 µm)
- Backside Illumination (BSI)
- Progressive scan
- I²C interface
- CSI-2 4 lanes
- Binning:
Horizontal 1/2
Vertical 1/2, 1/4
- Built-in phase lock loop (PLL)
- Window of interest (Windowing to any arbitrary size fixed center)
- Image scaling (programmable scaling for image size)
- Picture flip (horizontal and vertical)
- Lens shading correction
- Defect pixel correction

Applications

- Cellular phones and mobile products

- High Dynamic Range (HDR)
- Context switch
- 2nd PLL for CSI-2 output
- Global reset for mechanical shutter
- Strobe timing pulse
- Color Noise Reduction (CNR)
- Standby mode, Power down mode
- OTP (8k bits one-time memory)

Specifications

- Optical format: 1/3.07"
- Pixel size: 1.12 μm \times 1.12 μm
- Effective pixels: 4208 (H) \times 3120 (V)
- Data formats: RAW-8, 10 bits

- Frame rate:
 - 30 fps @full resolution
 - 60 fps @ 1080p
 - 60 fps @ 720p
 - 120 fps @VGA
- Power supply:
 - Analog = 2.6 to 3.0 V
 - Digital = 1.1 to 1.3 V
 - I/O = 1.7 to 3.0 V
- Operating temperature: -20 to $+65^{\circ}\text{C}$
- Storage temperature: -40 to $+85^{\circ}\text{C}$

- The information contained herein is subject to change without notice.
- The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA for any infringements of patents or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any patent or patent rights of TOSHIBA or others.
- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situation in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc.
- The Toshiba products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These Toshiba products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc. Unintended usage of Toshiba products listed in this document shall be made at the customer's own risk.
- The products described in this document may include products subject to foreign exchange and foreign trade laws.
- The products contained herein may also be controlled under the U.S. Export Administration Regulations and/or subject to the approval of the U.S. Department of Commerce or U.S. Department of State prior to export. Any export or re-export, directly or indirectly in contravention of any of the applicable export laws and regulations, is hereby prohibited.
