

Ameren Installs Toshiba Gas Insulated Transformer at Missouri's Osage Plant

Toshiba installed a Gas Insulated Transformer (GIT) at Ameren Missouri's Osage Plant, which supplies hydroelectric power to the 75-year-old Bagnell Dam. Ameren Missouri will replace all of the plant's existing oil-insulated transformers with gas-insulated units by 2013.

Toshiba is globally renowned for its GIT manufacturing and has supplied more than 700 units around the world for over 40 years. As a leader in GIT technology, Toshiba has extensive experience including the installation of the world's largest GIT, 400 MVA/330 KV.

Advantages of GITs:

- No Oil Leakage
- Non-Flammable
- Non-Explosive
- Low Failure Rate
- Compact

Suitable for:

- Hydro Power Stations
- Underground Substations
- Densely Populated Cities
- Offshore Platform
